2023 Version 1.0

A 10 VARIO

A7 VOR

A12 VARIO

VARIO log splitters can work in several positions making them very effective, maximising productivity. They feature twin speed controls that optimise performance and 12-ton models have a twin speed pump as standard. The newly designed inclined wedge has increased performance by 30%, making it easier to penetrate harder species of wood. Non-slip aluminium inserts on the base of the log splitter allow you to work precisely without having to reposition the log when splitting.

DOUBLE PUMP

(A10 VARIO EM-ET) **£270**

2X

C 90

C90 log splitters are the result of the evolution of the classic style of log splitter. With 8.5 tons of power, the thin blade with a sharp incline angle is very effective. The large table provides practical workspace. Aluminium inserts on the base of the table allow for precise working during the splitting phase. The stroke of the wedge is adjustable via a clamp making it possible to save cycle time. The PLUS model, with its double pump, guarantees a very high-efficiency thanks to the automatic double speed. On the side of the operating levers, there are supports for placing the logs without having to pick them up from the ground each time.

BR 13 500

PRO 16 K

PRO 16 ROAD

BR13 is a log splitter capable of splitting lengths up to 55cm and has an adjustable table. It is ideal for preparing wood for stoves, fireplaces or boilers. Thanks to the double speed and 13 tons of splitting power it is an efficient, productive and very robust tool.

Pro 16K is a shorter length version of our popular PRO-LINE Vertical log splitters. Built to last they feature a non-deformable beam and have a tank separate from the structure. Fast and powerful, ideal for working with large and heavy logs. They come with double speed and are available in a 16-ton version.

PRO 19 BIG SB ROAD

PRO-LINE Vertical is Balfor's flagship range of log splitters. Compared to the S-line it has a richer range of accessories, including a log pick, chainsaw holder, adjustable lifting attachments, a larger base frame with invited edges, a right-hand high handle and a left-hand movable handle mounted on bearings, and pipes lined with anti-shear steel mesh. Thanks to their robustness, extensive standard equipment and careful construction, they are feature-rich and able to take the most demanding wood.

 YouTube**PRO 45 OR 2100****PRO 35 OR****PRO 22 OR**

The **PRO series horizontal** log splitters are very robust log splitters, built to be efficient and make the splitting of longer lengths easier and more precise. Due to the smart design, they are easy to transport to different job sites as they fold up to sit behind the back of a tractor or for storage. Thanks to the hydraulic loading (available on all standard versions), the AUTOLOAD system makes it easy to move larger logs on to the bed for splitting. The fully adjustable hydraulic knife allows you to split the log with extreme precision. Once the log is split the table holds the split wood allowing the operator to pick up without the need for bending. The whole frame, as well as the hydraulic wedge, are made of non-deformable DOMEX steel, a guarantee of quality and maximum durability.

The **ROAD** extended bed versions are equipped with rear lights, large trailer wheels and removable drawbar and are used for longer lengths of timber and oversized logs.

SHARK 700 C

SHARK 700 EM

SHARK 708

SHARK saws are the result of careful research and decades of experience in the manufacturing of professional saws. SHARK is the only saw that can cut logs over 30 cm in diameter, they also allow great visibility when cutting providing safely without obstructing the view of the cutting operation. They come with saw holder, adjustable rear blade guide, WIDIA blade, 3-belt drive (not 220V), vacuum system, emergency brake and double log grip handle mounted on bearings are just some of the features that make SHARK a superior product. Like all Balfor products, Shark complies with the latest safety standards.

SHARK 700 EXPERT

SHARK EXPERT is the combination of the SHARK sawing machine with a wide conveyor belt with three hydraulic extensions. Because it has three extensions, SHARK EXPERT can benefit from the aid of a 5-metre belt, which when folded away makes it very compact and space-saving. The 40cm wide conveyor help to effortlessly transport the logs after cutting. The conveyor extends is hydraulic and has metal paddles and interchangeable PVC belt sections.

SAMURAI EXPERT AUTOMATIC

SAMURAI 700

The **SAMURAI 700** is a pull-style saw capable of easily cutting all types of wood, logs or bundles of branches. Thanks to the innovative system, the SAMURAI 700 allows you to work with minimal effort as you don't need to move the weight of the wood just the well-balanced blade. SAMURAI 700 makes the cutting fast, safe and efficient thanks to the use of high-level components and weighted wide blade, rollers help to advance the log and the PTO version has a hydraulic transmission. SAMURAI 700 is a sawing machine of a superior level to any other.

SAMURAI 700 EXPERT AUTOMATIC is an automatic cutting version, making the process simple and fast with superior productivity. With a maximum output of 7 cubic metres per hour, the SAMURAI 700 EXPERT AUTOMATIC can work with logs or split wood. The operator only has to load the wood to be cut and the machine does the rest!

BALFOR 

NINJA 800 EXPERT

NINJA 800 Expert is our newest model and can work on all types of wood, branches and logs and can cut, split and load your timber. By opening or closing the log holder, the operator can decide whether the wood should fall directly into the conveyor or be taken and split into a smaller diameter. The log splitter has 16 tons of power and is equipped with a robust hydraulic knife with two interchangeable splitting wedges. The wide conveyor belt with three hydraulic extensions allows fast and efficient evacuation of all the wood to be processed by the machine. The logs are moved forward with a conveyor belt and the 800 mm WIDIA blade is fully hydraulic. The operator only has to operate the levers as it's completely hydraulic. Maintenance is reduced to a minimum and to avoid overheating, an oversized tank combined with a large oil cooler. NINJA 800 Expert is already equipped with auxiliary hydraulic connections allowing the use of chain-driven log decks.

MULTICUT

MULTICUT is Balfor's automatic multi-blade saw. Thanks to the triple-blade system and the possibility to set the cut to any length, this automatic saw has the highest hourly productivity ever built. The loading star rotates continuously and the operator only has to load the saw and MULTICUT takes care of the rest!

CONTINENTAL 416 JOY

The **CONTINENTAL 416** is a highly productive firewood processor. With its 400 mm cutting capacity performed by a powerful hydraulic chainsaw, with a 16-ton splitter. The operator controls are hydraulic and the hydraulic wedge made of DOMEX® material allows you to split your logs avoiding waste or asymmetrical splitting. It comes with 3 splitting wedges 2/4, 6 & 8 way as standard. The Continental 416 is equipped with an oversized oil tank, with cool cooler and several compartments for storing tools or spare chains etc. . . The Continental 416 is also equipped with a hydraulic 3-stage conveyor and hydraulic connections for the use of a chain.

CONTINENTAL 750

YouTube

Balfor's Continental 750 Special ranks among the largest high productivity firewood processors on the market. With the ability of cutting up-to 70cm in diameter and with a splitting force of 50 tons, it is able to perform in all situations.

The continental 750 is equipped with high-capacity wheels and a drawbar with hydraulic foot to be easily moved within the work site. As standard there is a 2.5 metre log deck with chains to advance the logs.

It comes with work lights for working in poor visibility. Roller conveyor with motorised metal rollers. Double splitting wedge 18 and 28 pieces that can be changed in a few seconds via hydraulics. Minimum length of cot is 25 cm to 65 cm maximum. Operator works on the raised platform for greater visibility and control of the machines functions.

NT 5.5/300 PI

BALFOR conveyor belts are the strongest and heaviest on the market. Built to last and to minimise maintenance and spare parts. Thanks to the modular design of the PVC belt, you have the possibility of varying their length and repairing them with little expense in the event of damage. The paddles are made of metal to maximise durability.
