SIMPLE. UNIVERSAL. STRONG.

GRIZZLY M300e – THE NEW ALL-ROUND MULCHER FOR LOWER RANGE EXCAVATORS

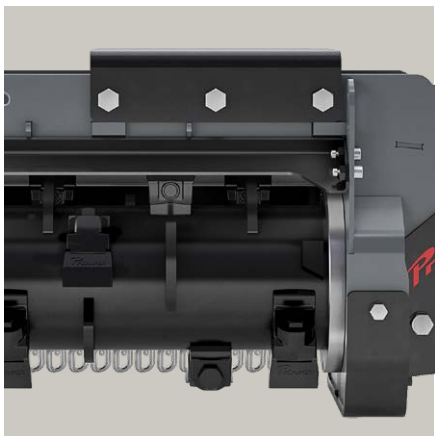

The new Grizzly M300e forestry mulcher is for excavators in the 1.5–4 ton excavator class.

It is equipped with a powerful 11 or 17 cc hydraulic motor to cover the flow range of smaller excavators and to achieve the best performance for perfect mulching results.

SKIDS
Wear resistant skids made from Hardox do effectively protect the housing. Bolted skids enable fast replacement – for reduced downtime and increased productivity.

HOUSING
Robust Hardox housing for tough forestry use, with easy access to service points. The adjustable deflector ensures controlled discharge of mulched material.

THUMB BRACKET
Practical thumb bracket for placing material to be mulched. With the installation of a counterpart, a gripper to move the mulching material can be added.

SIMPLE AND STRONG

Universal forestry mulcher for landscaping, municipal and agricultural use – efficiently mulches brush and small trees.

MAIN TECHNICAL BENEFITS

- The low weight of the mulcher increases the stability of the excavator, even on difficult terrain
- Powerful gear motor options available (11 / 17 cc)
- Direct drive, no case drain line necessary
- Hydraulic connections are protected inside the housing
- Fixed thumb bracket
